French Ice Hockey Association **FFHG**

International Transfer Card

Please be advised that French Hockey is very willing to co-operate in the processing of transfer cards that will allow FRENCH players to play in your country.

However, please be aware that upon our issuing a transfer card on behalf of the specific player to your club, you are agreeing to the IIHF rules and regulations outlined in the International Transfer Regulations section 10 (Release of a Player for National Team Games) on page 53 of the IIHF IT Regulations.

It is compulsory that club teams understand that French Association may select players from any team and it is the club's responsibility to release the player. The club team is obligated to do so as it is outlined in the IIHF Rules and Regulations in International Transfers as reminded below.

10.1 Any club that has registered a player who is eligible under IIHF By-Laws to play for the national team of a member national association must, in the event that he is selected for one of its representative teams, release him to the member national association for which team he is eligible to play, irrespective of age and in accordance with the IIHF International Transfer Regulations, which in this respect includes all players whether transferred or not.

This is a new policy regarding the issuing of International Transfer Cards. Prior to issuing the player card, the respective club and player must sign this document stating that they fully understand that the respective player have to be available for the French National Association at any time in accordance with the IIHF regulations and that the player may be selected to play for French's National Team.
